

Clinic Connect[®]

FOR PROVIDERS

In-office nursing solutions to support practice staff

AIS Healthcare
Targeted Drug Delivery

Advancing quality.
Improving lives.

How Clinic Connect® works

An AIS Healthcare registered nurse with extensive TDD experience works as an extension of the physician's team, performing all pump refills and services with the physician's oversight. This includes:

- ✓ Pump refills
- ✓ Standard and complex programming
- ✓ Scheduling visits for pump patients
- ✓ Ordering medication
- ✓ Documenting care in an electronic health record (EHR) system
- ✓ Obtaining labs for compliance testing
- ✓ Care coordination
- ✓ Other tasks based on clinical needs

Benefits of Clinic Connect:

- ✓ Adds the experienced staff you need to help your TDD program grow
- ✓ AIS Healthcare carries liability for nursing services and procedures
- ✓ All reports and documentation housed at the clinic office for easy reference
- ✓ The nurse is provided at fair market value, and the practice can bill for procedures performed at the clinic

"Utilizing a Clinic Connect nurse in our clinic has increased productivity in my office."

Anjum Bux, MD

Director at Large, Kentucky Society of Interventional Pain Physicians
